The 'Yes' respondents to this question could mark more than one category (they averaged just over 2 each). In the 'male', 'female' and combined blocks, the percentages are of that column's total. So the percentage of those female members 18-29 going nude at home is 92.3% of 13; and at a public sauna or spa: 53.8% of 13. (Note that the female 70+ column has a sample of only 2.) On the subtotal lines, the percentages are of the relevant total (ie: F - 115; M - 155). Thus the seven males 18-29, represent 4.5% of the total of 155. The totals column on the right shows, in the 'female', 'male' and combined blocks, the 'net' percentage for it's row to the left. So 59.6% 'go nude at the beach'. However, the subtotals (in the totals column) show the percentage of the total membership. So of all members, the 'Yes' respondents were 38.1% female and 51.3% male. (A total of 10.6% said 'No', they don't go naked away from the club.)

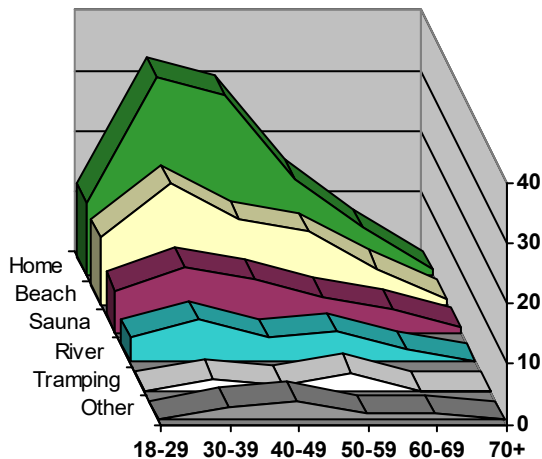

Members Going Nude Outside Club (Female)
